

17 APRIL 2017 (MONDAY)

Name Of Course 1	Introduction To Qualitative Research
Synopsis	This course provides an overview of the qualitative research and divided into five main segments: (1) Introduction To Qualitative Research (2) Conceptualizing The Research (3) Data Collection Strategies (4) Data Analysis Steps, And (5) Tips For Report Writing.
Duration	4 Hours (8.30am-1pm)
Objectives	1) To provide an overview of the qualitative research paradigm and conceptualization of a qualitative research 2) To expose the various qualitative research designs 3) To explain the various data collection instruments in a qualitative research 4) To discuss the qualitative data analysis and reporting strategies
Target Participants	1) Postgraduate Students 2) Lecturers 3) Researchers
Course Modules	Module 1: • Introduction To Qualitative Research • Conceptualising The Title, Problem Statement, Research • Questions And Objectives Module 2: • Five Qualitative Research Designs • Narrative, Phenomenology, Ethnography, Grounded Theory, Case Study Module 3: • Data Collection Strategies • Interviews, Focus Group, Observation, Open-Ended Survey, - Field Visit, Archival Research, Etc. • Tips And Strategies For Data Collection Module 4: • Data Analysis Steps • Deductive Vs Inductive Approaches • Preparing The Data For Analysis • Building The List Of Codes • Manual Vs Computer-Aided Softwares Module 5: • Report Writing • Different Strategies For Validity Of Findings

26 APRIL 2017 (WEDNESDAY)

Name Of Course 2	Qualitative Analysis With ATLAS.ti 8 Windows
Synopsis	Qualitative data analysis simply means to convert the raw data sources (participant's text/voices/images) into the interpreted format (findings/research report). This course demonstrates the main functions in ATLAS.ti for the purpose of qualitatively making sense of different types of data formats, such as textual, images, audio, video and maps.
Duration	4 Hours (8.30am-1pm)
Objectives	1) To learn the basic functions of ATLAS.ti for understanding qualitative data through integration and reporting 2) To practice (hands-on) how to analyse different data formats (textual, images, audio, video, maps) using thematic coding 3) To learn how to do the writeup of the findings based on the visual, textual and numerical reports of ATLAS.ti
Target Participants	1) Postgraduate Students 2) Lecturers 3) Researchers
Course Modules	Module 1: Overview Of Qualitative Analysis • Conceptualization Of Research • Basic Steps In Data Analysis Module 2: Introduction To ATLAS.ti 8 Windows • Creating A Project • Adding Data Sources (Textual, Images, Audio, Video, Maps) • Grouping Based On Shared Attributes Module 3: Going Through The Data • How To Prepare Deductive List Of Codes • Open Coding For Inductive Reasoning • Auto-Coding For Finding General Overview Of The Data Module 4: Reporting Your Findings • Visualising Your Analysis Using Networks • Creating Textual And Numerical Reports In ATLAS.ti • Tips For Report Writing And Validity Strategies Module 5: Creating Backups In ATLAS.ti 8 • Using The Bundle Function To Create Backups

27 APRIL 2017 (THURSDAY)

Name Of Course 3	Literature Review With ATLAS.ti 8 Windows
Synopsis	Literature review is a continuous process throughout the entire research journey. Along the journey, researchers are faced with problems such as the lack of system to manage the literature and writer's block problem. This course will demonstrate the basic functions of ATLAS.ti 8 Windows for the purpose of managing the literature, managing the important points in the literature, and preparing the written review based on the report generated in ATLAS.ti
Duration	4 Hours (8.30am-1pm)
Objectives	1) To learn the basic functions of ATLAS.ti for managing literature for review purpose 2) To practice (hands-on) how to prepare literature, go through literature and prepare reports in ATLAS.ti 3) To learn how to visually and textually make sense on the literature for review purpose
Target Participants	1) Postgraduate Students 2) Lecturers 3) Researchers
Course Modules	Module 1: Introduction To Literature Review • Why Do Literature Review • Problems Faced In Doing Literature Review Module 2: Introduction To ATLAS.ti 8 • Creating A Project • Adding Literature As Documents • Grouping Based On Shared Attributes Module 3: Reading Through The Literature • Deductive Vs Inductive Coding Approaches • Building A List Of Codes For Literature Review • Auto-Coding For Word Frequency Module 4: Creating Reports In ATLAS.ti 8 • Visual – Network Views • Textual Reports • Numerical Reports • Reporting The Literature Review Module 5: Creating Backups In ATLAS.ti 8 • Using The Bundle Function To Create Backups
