CeTMA ORGANIZED "AMAZING VISUALIZATIONS AND PREDICTIVE ANALYTICS WORKSHOP"

CeTMA-Online: Centre for Testing, Measurement and Appraisal (CeTMA) has organized "Amazing Visualizations and Predictive Analytics Workshop" on September 27, 2017 at the Multipurpose room, SQS building which was delivered by CeTMA's fellow researcher who is also a resident faculty of OYAGSB, Dr. Bharat Bhushan Verma. Data Visualization has emerged as a specialization in last decade. This unique two modules program is conceptualized to understand the new technological breakthroughs in data management, visualization and predictive analytics using MicroStrategy. The first session of the workshop began with an overview of microstrategy in terms of data preparation, building blocks of visualization and amazing visualizations using D3. Following that, advanced data visualizations, dashboard design and predictive modeling were covered by Dr. Bharat Bhushan Verma. Dr Bharat stated that it is an unique opportunity to quickly learn the latest features of MicroStrategy and apply predictive analytics visually. CeTMA would like to take this opportunity to thank Dr. Bharat Bushan Verma for his great knowledge sharing. It is hoped that all participants found the workshop to be both interesting and informative.

Thank you.
