UUM ONLINE: The Universiti Utara Malaysia (UUM) Innovation and Commercialization Centre (ICC) recently hosted the 'UUM ICC-MyIPO Webinar: What is a Patent?' on the Webex application.

The two-hour webinar was presented by Senior Patent Examining Officer from the Intellectual Property Corporation of Malaysia (MyIPO), Mdm. Sofia Rehan Ramli together with fellow moderator, Assoc. Prof. Dr Khadijah Mohamed who is the Deputy Director of the ICC.

During the sharing session, Mdm. Sofia Rehan explained the different types of patentable inventions, the patentability requirements of an invention, examples relevant to the thrust areas available at UUM, as well as tips and guidelines on how to use information from patent searches to aid in ongoing innovation efforts.

She went on to say that the ICC's programme was in line with MyIPO's weekly programme, both of which aimed to provide the public with new information.

Participants in the programme also benefited from the question-and-answer session, during which various questions about intellectual property, particularly patents, were raised, such as guidelines for identifying types of intellectual property other than patents, patent application procedures, and the potential patentability of a product or innovation developed by researchers.

Meanwhile, Dr. Khadijah stated that, in addition to responding to the Gagasan Gemilang-Akademia and Admin Holistik (GAGAH) UUM 2021-2025 initiative launched by the Deputy Vice-Chancellor (Research and Innovation) through Rapid 3: Innovation and Commercialization to cultivate and invigorate innovation and commercialization activities in UUM, the programme was also a meaningful addition to the denizens of UUM during the Movement Control Order 3.0.

Nearly 140 participants attended the programme, which included lecturers from Bandar Darulaman Community College, UiTM Merbok Branch, Legal Officers from the Negeri Sembilan Islamic Religious Council, Universiti Malaysia Perlis, and the Kedah Islamic Religious Council, as well as UUM staff and students from various fields, to obtain information on the patent category intellectual property.
