INTERNATIONAL CONFERENCE ON SUSTAINABLE CORRIDOR DEVELOPMENT 2013

25 – 26 June 2013 | Golden Sands Resort, Penang

Introduction

Under the Ninth Malaysian Plan, various strategic plans were developed with the objective of stimulating regional growth in the states of Malaysia which is balanced and with the aim of bridging income disparities. One of such plans is the creation of the Regional Development Corridors. Five of such development corridors are: Iskandar Malaysia, NCER, ECER, SCORE and SDC. Under the Tenth Malaysia Plan (2011-2015), regional economic development in these corridors will be further accelerated by focusing on a number of high-density clusters in the corridors that have sector and geographic advantages. Clustering enables the companies to benefit from the same limited source, and facilitates the matching of labor market and consequently resulted in the contribution of knowledge sharing.

The Conference Aims To:

- ❖ Facilitate exchange of ideas on contemporary issues and challenges of corridor development at national and international level;
- ❖ Provide networking's opportunities among stakeholders of corridor development at national and international level;
- ❖ Generate innovative ideas to produce a broad impact and sustainable development in corridor development regions.

General Themes:

- "Managing Limited Resources in Generating and Collaborating Innovative Ideas to Maximize the Potential of Corridor Development"
- "Broadening and Deepening Private Sectors Involvement Towards Sustainable Corridor Development"
